Journal of Membrane Science 114 (1996) 269–270

journal of MEMBRANE SCIENCE

Contents

Nanoscopic particle-doped polymer membrane prepared by the counter diffusion method and its properties
Y. Kurokawa (Sendai, Japan) 1
Sorption of glucose by an anion-exchange membrane in the borate form. Stability of the complexes and the facilitated transport of glucose
S. Ouahid, M. Métayer, D. Langevin and M. Labbé (Mont Saint Aignan, France) 13
Effects of proteins on electrokinetic properties of inorganic membranes during ultra- and micro-filtration
L. Ricq, A. Pierre, J.-C. Reggiani, S. Zaragoza-Piqueras, J. Pagetti (Besancon, France) and G. Daufin (Rennes, France) 27
Flux enhancement by hydrophilization of thin film composite reverse osmosis membranes
A. Kulkarni, D. Mukherjee and W.N. Gill (Troy, NY, USA) 39
Determination of some electrical parameters for two novel aliphatic–aromatic polyamide membranes
J. Benavente (Málaga, Spain), J.M. García, J.G. de la Campa and J. de Abajo (Madrid, Spain) 51
Membrane bioreactor for lactic acid production
H. Moueddeb, J. Sanchez, C. Bardot (Villeurbanne, France) and M. Fick (Vandoeuvre-les-Nancy, France) 59
Study of the stability of some supported liquid membranes
C. Hill, J.-F. Dozol, H. Rouquette, S. Eymard and B. Tournois (Saint-Paul-lez-Durance, France) 73
Nanofiltration membrane behavior in a supercritical medium
S. Sarrade (Pierrelatte, France), G.M. Rios (Montpellier, France) and M. Carlés (Pierrelatte, France) 81
Fouling and cleaning of membranes in the ultrafiltration of the aqueous extract of soy flour
S.K. Sayed Razavi (Tabriz, Iran), J.L. Harris and F. Sherkat (Melbourne, Australia) 93
Electrochemical properties of cellulosic ion-exchange membranes. III. Application to ion-selective electrodes
M.D. Reboiras (Madrid, Spain) 105
Mechanisms of protein fouling in cross-flow UF through an asymmetric inorganic membrane
P. Prádanos, A. Hernández, J.I. Calvo and F. Tejerina (Valladolid, Spain) 115

Short communications
Separation of methyl ethyl ketone from water by pervaporation using a silicalite membrane
J.F. Smetana, J.L. Falconer and R.D. Noble (Boulder, CO, USA) 127
A comment on the concentration polarization build-up in hollow fibers
P. Aimar (Toulouse, France), I. Tosun, N. Akman and T. Tincer (Ankara, Turkey) 131

Book review 135
Meetings calendar 137

Analysis of concentration polarization phenomenon in ultrafiltration under turbulent flow conditions
M.S.H. Bader and J.N. Veenstra (Stillwater, OK, USA) 139
Regenerated cellulose microporous membranes by mixing cellulose cuoxam with a water soluble polymer
G. Yang and L. Zhang (Wuhan, China) 149
An improved model incorporating constriction resistance in transport through thin film composite membranes
S.K. Karode, V.S. Patwardhan and S.S. Kulkarni (Pune, India) 157
Mathematical modeling of silver extraction by an emulsion liquid membrane process
S.C. Lee (Chonbuk, South Korea), B.S. Ahn (Seoul, South Korea) and W.K. Lee (Taejeon, South Korea) 171
Unique carrier properties of neutral lanthanide complex for inorganic anions
H. Tsukube (Okayama, Japan; Osaka, Japan), J.-i. Uenishi, H. Shiba and O. Yonemitsu (Okayama, Japan) 187
Selective permeation of CO_2 through poly{2-(*N*,*N*-dimethyl)aminoethyl methacrylate} membrane prepared by plasma-graft polymerization technique
H. Matsuyama, M. Teramoto and H. Sakakura (Kyoto, Japan) 193

Kinetics of bonded invertase: asymmetric polysulfone membranes
J. Kotzelski and E. Staude (Essen, Germany) 201
A network model for the permeability of condensable vapours through mesoporous media
M.E. Kainourgiakis, A.K. Stubos, N.D. Konstantinou, N.K. Kanellopoulos (Attikis, Greece) and V. Milisic (Talence, France) . . 215
Pervaporation of ethanol–water mixtures through polydimethylsiloxane–polystyrene interpenetrating polymer network supported membranes
L. Liang and E. Ruckenstein (Buffalo, NY, USA) 227
Mass transfer improvement by secondary flows: Dean vortices in coiled tubular membranes
P. Moulin, J.C. Rouch, C. Serra, M.J. Clifton and P. Aptel (Toulouse, France) 235
Effect of liquid pulsation on protein fractionation using ultrafiltration processes
S. Najarian and B.J. Bellhouse (Oxford, United Kingdom) 245
Electrical resistance and coulomb efficiency of electrodialysis (ED) apparatus in polarization
T. Wen (Guangzhou, PR China), G.S. Solt (Cranfield, United Kingdom) and D.W. Gao (Guangzhou, PR China) 255
